## Finishes worthy of the Milgard Name

Milgard products are engineered to perform to a higher standard. We developed a two-coat formulation that outperforms the competition. In fact, this formulation is so durable it meets the same color and gloss performance standards as our dependable standard vinyl colors.

Other windows may reflect damaging UV rays, which over time can dull, warp and crack the paint. Milgard Premium Exterior Vinyl Finishes, on the other hand, are translucent. New coating technology allows UV rays to pass through Milgard paint so that the vinyl reflects the UV rays. This preserves the exterior color and finish.

## Color screens to match your windows and doors

The screens that come with Milgard windows and patio doors are made of durable aluminum and most\* are color-matched exactly to the frame color.

\*Bronze screens are a complementary color, Silver screens are gray.

## Attractive Grids

Milgard has paid attention to detail by matching the grids to the frame. Whether you choose flat or sculpted grids between the glass or Simulated Divided Lites, the grids are color-matched to the frame on the exterior and are white on the interior.
